MAY 16 1994

THE PROVINCE OF ALBERTA

OIL AND GAS CONSERVATION ACT

ENERGY RESOURCES CONSERVATION BOARD

MRL ORDER NO. 56

WHEREAS the Modified Proration Plan (MPP) has been revised and an MRL Order is required as described in Informational Letters IL 89-8 and IL 89-11.

THEREFORE, the Energy Resources Conservation Board, pursuant to the Oil and Gas Conservation Act, being chapter 0-5 of the Revised Statutes of Alberta, 1980, hereby orders as follows:

1. (1) The monthly oil base maximum rate limitation (base MRL) in a conventional crude oil pool designated by Board order and named in Appendix I to this order shall be,

(a) for a well, equal to the product of the drilling spacing unit (DSU) area of the well and the base MRL per hectare for the pool or pool type as set out in columns 4 and 5 of Appendix I,

(b) for a block or project, equal to the product of the total productive area set out in the form "Appendix to PSU, Block or Project Approval", and the base MRL per hectare for the pool or pool type as set out in columns 4 and 5 of Appendix I,

or as otherwise provided for in Appendix II to this order.

(2) The monthly MRL for a well, block or project named in clause 8 of Appendix II to this order shall be the product of the off-target penalty factor* and the base MRL prescribed in accordance with subclause (1).

(3) Notwithstanding subclause (2) hereof, a monthly base MRL prescribed under subclause (1) shall be reduced through multiplication by the GOR penalty base specified in column 6 of Appendix I, and any applicable provision in Appendix II or other Board orders or approvals held by operators of the pool.

2. (1) A well completed in a conventional crude oil pool not referred to elsewhere in this order shall have a base MRL per month, determined using parameters set by the Board following application (Board Form 0-38) by the operator and approval by the Board, equal to the greater of

(a) the product of the basic well rate per day and the number of days in the month, or

(b) the base MRL.

(2) The base MRL, determined in accordance with subclause (1), shall be reduced through multiplication by any applicable penalty factors.

General

3. Where the base MRL of a well, block or project is subject to a gas-oil ratio penalty factor**, the penalty factor shall be determined on the basis of production in the third last preceding month.

4. (1) When a new well commences production from a pool, it may produce at a new well rate that is the greater of its base MRL or 20 cubic metres per day for the first four producing months within one year of its on-production date, unless the well

(a) is in a block or project,

(b) replaces a well which previously produced from the drilling spacing unit,

(c) is shut down by Board order, or

(d) is prohibited from producing,

and the new well shall be subject to other conditions set out in IL 87-9.

(2) Where the base MRL of a well referred to in subclause (1) is subject to a gas-oil ratio penalty factor, the penalty shall not be calculated or applied until the fifth month during which the well has reported production.

5. Individual wells or groups of wells identified in clause 9 of Appendix II to this order are subject to selective application of maximum rate limitations.

6. A basic well rate established by this order is subject to off-target and gas-oil ratio penalties; however, the off-target penalty will not normally reduce the basic well rate to less than 5.0 cubic metres per day unless so directed by the Board pursuant to IL 83-12.

7. A base MRL established by this order for a well is not normally subject to off-target penalty when the well is the only well producing in a Board-designated pool in accordance with IL 82-14.

8. Wells in pools on good production practice (GPP)*** may be subject to provisions specified in Appendix II to this order or other Board orders or approvals held by operators of the pools.

9. This order comes into force on 1 May 1994.

MADE at the City of Calgary, in the Province of Alberta, this 25th day of April 1994.

ENERGY RESOURCES CONSERVATION BOARD

* In accordance with section 4.070 and Part 10 of the Oil and Gas Conservation Regulations, it is the responsibility of the operator of a well to assess any applicable off-target penalty factor to the base MRL of a well, or production entity, even if the penalty is not prescribed in clause 8 of Appendix II to this order.

** The base by which the GOR penalty factor is determined is set out in the Oil and Gas Conservation Regulations, section 10.050.

*** GPP, as defined in the Oil and Gas Conservation Regulations, section 1.020(2)9, may be rescinded by the Board where conditions change substantially in a pool, or where GPP is no longer considered appropriate.

APPENDIX I TO MRL ORDER NO. 56

NOTES:

Column 1: Field/Pool name - self-explanatory.

Column 2: Codes - field, pool and type codes as defined by the Board classifications.

Column 3: The basic well rate shall be in accordance with the attachment to Board Informational Letter IL 83-12. This rate is multiplied by the number of days in the month to give the basic well rate on a monthly basis.

Column 4: The MRL, shown on a daily basis, is equal to the monthly MRL (column 5) divided by the number of days in the month.

Column 5: The MRL per hectare for a pool type is the maximum monthly rate of production per hectare.

Column 6: The GOR penalty base is calculated in accordance with Schedule 6, Part A of the Regulations.

Column 7: This column lists Special Provisions which are applicable to pools, or to individual wells or groups of wells in a pool type. The specific clauses appear in Appendix II.

APPENDIX II TO MRL ORDER NO. 56

MAY, 1994

SPECIAL PROVISIONS

Gas-Oil Ratio

1. The GOR penalty factor assessed against production from the listed entities is obtained by applying its net gas production to the penalty base specified below, or where not specified below, as specified in Appendix I. Net gas production is defined as the difference between gross gas production and gas delivered to an approved gas gathering system, injected into an approved gas-injection scheme or used for lease fuel.

Pool	Well, Block or Project	GOR Penalty Base
Highvale Lower Mannville A Primary	Project No. 3 00/14-20-050-04 W5 00/16-20-050-04 W5 00/06-29-050-04 W5/2 00/14-29-050-04 W5 00/02-21-051-04 W5/2 00/08-22-051-04 W5	
Peco Cardium C	00/07-05-048-15 W5	140
Pembina Ellerslie A	Project No. 1	
Ribstone Sparky B	00/10-03-043-04 W4/2	70
Swan Hills South Beaverhill Lake A & B	00/02-16-065-10 W5	
Valhalla Doe Creek L	00/06-25-075-10 W6	
Worsley Charlie Lake B	00/02-04-088-07 W6	

3. The production from any well in the listed project or pool shall, where the producing GOR exceeds the level specified in the relevant enhanced recovery and/or concurrent production approval, be restricted to the maximum rate shown subject to a GOR penalty factor calculated based on the penalty base specified below:

Clause 3 Cont'd...

Project or Pool	MRL (m^3/day)	GOR Penalty Base
Boundary Lake South Triassic C Project No. 1	16.0	180

5. The following wells located in pools subject to GPP are assigned the prescribed maximum rate limitations and off-target penalty factors:

Field/Pool	Well	Base MRL (m^3/d/w)	Off-target Penalty
Cessford Mannville Y & Z	00/02-02-025-13 W4	8.0	0.287
Grand Forks Sawtooth L	00/03-12-012-13 W4	8.0	0.127
Grand Forks Sawtooth O	00/16-05-012-13 W4	25.0	0.803
Nipisi Gilwood A - Primary	00/15-24-078-08 W5	20.0	0.250

6. a In accordance with the Board's letter to All Operators dated 20 November 1990, unless otherwise approved by the Board, pools declared in the D-1 (Wabamun) Formation in the fields listed below shall be subject to an MRL of 40 m^3/day per well regardless of drilling spacing unit size.

Belloy	Eaglesham North
Culp	Normandville
Eaglesham	Tangent

b In accordance with the Board's letter to All Operators dated 1 February 1989, pools declared in the Banff Formation in the fields listed below shall be subject to the following:

1. GOR penalty relief on the basis of net gas production as defined in Clause 1 of the Special Provisions to the MRL Order.

2. Unless otherwise approved by the Board an MRL of 25 m^3/day/well regardless of drilling spacing unit size.

Chain	Michichi
Craigmyle	Pearl
Delia	Watts

c Subject to conditions specified in Board letters dated 21 April and 22 June 1993 pools declared in the Granite Wash Formation in the fields listed below shall be subject to Good Production Practice.

Evi	Ogston
Kitty	Otter

7. Wells in any of the listed pools from which gas is not being gathered and delivered to an approved gas gathering system shall be subject to a maximum daily oil rate limitation and GOR penalty base as shown:

Pool	MRL (m^3/d/w)	GOR Penalty Base
Garrington Viking CC & Mannville B	16.0	530

Off-Target Penalty

8. The monthly base MRL of the following wells, blocks or projects shall be subject to the off-target penalty factor specified below:

Pool Name	Well, Block or Project Name	Off-Target Penalty Factor
Bantry Mannville F	Block No. 1	0.900
Bashaw D-2 E	00/12-05-042-23 W4/2	0.259

Miscellaneous

10. a Any well in the Hays Arcs A, C & E Pool exceeding a maximum daily gas production rate of 14.0 10^3m^3 must be shut in.

b Any well not conserving gas in the Penhold Viking B Pool shall be subject to a GOR penalty base of 110 m^3/m^3.

c All wells in Gift Gilwood pools are subject to a maximum producing GOR of 90 m^3/m^3 and a minimum operating pressure (MOP) of 7500 kPaA, as specified by Board Order No. Misc 93446.

e the rate of oil production from the following wells in the Cecil Charlie Lake A Pool shall be restricted to a base MRL of 8 m^3/day/well and a GOR penalty base of 90 m^3/m^3.

00/06-10-084-08 W6
00/08-16-084-08 W6
00/02-23-084-08 W6

f The well located in LS 14-24-75-10 W6 within the Valhalla Doe Creek L Pool shall not be subject to gas oil ratio penalty.

g The rate of oil production in the Enchant Arcs OO Pool shall not exceed 11.8 m^3/day/well. This rate would apply to all drilling spacing unit sizes.

(32 hectare dsu - 0.3688 m^3/day/hectare)
(64 hectare dsu - 0.1844 m^3/day/hectare)

Clause 10 Cont'd...

h

(1) Any well in the Sylvan Lake Jurassic A Pool having a producing GOR in excess of 3000 m^3/m^3 for two consecutive months shall be shut in.

(2) If the producing GOR for LS 14-18-37-3 W5 in the Sylvan Lake Jurassic A Pool exceeds 5000 for two consecutive months the well shall be shut in.

i The rate of oil production from the following wells in the Willesden Green Viking A Pool shall be restricted to:

00/04-06-041-06 W5	15.9
00/02-01-041-07 W5	23.8
00/10-01-041-07 W5	23.8

j The wells located in LS 1-10-34-5 W5 and LS 7-10-34-5 W5 within the primary mechanism of the Caroline Rundle A Pool shall be subject to a maximum rate limitation of 15 m^3/day/well.

k Any well in the Provost Upper Mannville M6M Pool having a producing GOR in excess of 100 m^3/m^3 shall be shut in.

l All wells conserving gas in the primary mechanism of the Kakwa A Cardium A Pool are subject to Good Production Practice.

n Project No. 1 and Project No. 2 within the Countess Upper Mannville D Water Flood are subject to Good Production Practice.

o The maximum producing GOR (gross) in the Wainwright Nisku A Pool shall not exceed 1 500 m^3/m^3 for 3 consecutive months. Any well in the pool exceeding this level shall be shut in until the well can demonstrate production characteristics below this level.

p The well located in LS 8-30-46-1 W5 within the primary area of the Pembina Belly River FFF, GGG, K2K and S2S Pool shall not be subject to gas oil ratio penalty.

s The maximum rate of oil production from the Utikuma Lake Keg River Sand MM Pool shall be reduced to 19 m^3/day/well if, at any time, the monthly producing GOR of either well exceeds the base GOR of 140 m^3/m^3.

11. The listed pools are subject to special MRL's as shown:

THE PROVINCE OF ALBERTA

OIL AND GAS CONSERVATION ACT

ENERGY RESOURCES CONSERVATION BOARD

MRL ORDER NO. 56

WHEREAS the Modified Proration Plan (MPP) has been revised and an MRL Order is required as described in Informational Letters IL 89-8 and IL 89-11.

THEREFORE, the Energy Resources Conservation Board, pursuant to the Oil and Gas Conservation Act, being chapter 0-5 of the Revised Statutes of Alberta, 1980, hereby orders as follows:

1. (1) The monthly oil base maximum rate limitation (base MRL) in a conventional crude oil pool designated by Board order and named in Appendix I to this order shall be,

(a) for a well, equal to the product of the drilling spacing unit (DSU) area of the well and the base MRL per hectare for the pool or pool type as set out in columns 4 and 5 of Appendix I,

(b) for a block or project, equal to the product of the total productive area set out in the form "Appendix to PSU, Block or Project Approval", and the base MRL per hectare for the pool or pool type as set out in columns 4 and 5 of Appendix I,

or as otherwise provided for in Appendix II to this order.

(2) The monthly MRL for a well, block or project named in clause 8 of Appendix II to this order shall be the product of the off-target penalty factor* and the base MRL prescribed in accordance with subclause (1).

(3) Notwithstanding subclause (2) hereof, a monthly base MRL prescribed under subclause (1) shall be reduced through multiplication by the GOR penalty base specified in column 6 of Appendix I, and any applicable provision in Appendix II or other Board orders or approvals held by operators of the pool.

2. (1) A well completed in a conventional crude oil pool not referred to elsewhere in this order shall have a base MRL per month, determined using parameters set by the Board following application (Board Form 0-38) by the operator and approval by the Board, equal to the greater of

(a) the product of the basic well rate per day and the number of days in the month, or

(b) the base MRL.

(2) The base MRL, determined in accordance with subclause (1), shall be reduced through multiplication by any applicable penalty factors.

General

3. Where the base MRL of a well, block or project is subject to a gas-oil ratio penalty factor**, the penalty factor shall be determined on the basis of production in the third last preceding month.

4. (1) When a new well commences production from a pool, it may produce at a new well rate that is the greater of its base MRL or 20 cubic metres per day for the first four producing months within one year of its on-production date, unless the well

(a) is in a block or project,

(b) replaces a well which previously produced from the drilling spacing unit,

(c) is shut down by Board order, or

(d) is prohibited from producing,

and the new well shall be subject to other conditions set out in IL 87-9.

(2) Where the base MRL of a well referred to in subclause (1) is subject to a gas-oil ratio penalty factor, the penalty shall not be calculated or applied until the fifth month during which the well has reported production.

5. Individual wells or groups of wells identified in clause 9 of Appendix II to this order are subject to selective application of maximum rate limitations.

6. A basic well rate established by this order is subject to off-target and gas-oil ratio penalties; however, the off-target penalty will not normally reduce the basic well rate to less than 5.0 cubic metres per day unless so directed by the Board pursuant to IL 83-12.

7. A base MRL established by this order for a well is not normally subject to off-target penalty when the well is the only well producing in a Board-designated pool in accordance with IL 82-14.

8. Wells in pools on good production practice (GPP)*** may be subject to provisions specified in Appendix II to this order or other Board orders or approvals held by operators of the pools.

9. This order comes into force on 1 May 1994.

MADE at the City of Calgary, in the Province of Alberta, this 25th day of April 1994.

ENERGY RESOURCES CONSERVATION BOARD

* In accordance with section 4.070 and Part 10 of the Oil and Gas Conservation Regulations, it is the responsibility of the operator of a well to assess any applicable off-target penalty factor to the base MRL of a well, or production entity, even if the penalty is not prescribed in clause 8 of Appendix II to this order.

** The base by which the GOR penalty factor is determined is set out in the Oil and Gas Conservation Regulations, section 10.050.

*** GPP, as defined in the Oil and Gas Conservation Regulations, section 1.020(2)9, may be rescinded by the Board where conditions change substantially in a pool, or where GPP is no longer considered appropriate.

APPENDIX I TO MRL ORDER NO. 56

NOTES:

Column 1: Field/Pool name - self-explanatory.

Column 2: Codes - field, pool and type codes as defined by the Board classifications.

Column 3: The basic well rate shall be in accordance with the attachment to Board Informational Letter IL 83-12. This rate is multiplied by the number of days in the month to give the basic well rate on a monthly basis.

Column 4: The MRL, shown on a daily basis, is equal to the monthly MRL (column 5) divided by the number of days in the month.

Column 5: The MRL per hectare for a pool type is the maximum monthly rate of production per hectare.

Column 6: The GOR penalty base is calculated in accordance with Schedule 6, Part A of the Regulations.

Column 7: This column lists Special Provisions which are applicable to pools, or to individual wells or groups of wells in a pool type. The specific clauses appear in Appendix II.

APPENDIX II TO MRL ORDER NO. 56

MAY, 1994

SPECIAL PROVISIONS

Gas-Oil Ratio

1. The GOR penalty factor assessed against production from the listed entities is obtained by applying its net gas production to the penalty base specified below, or where not specified below, as specified in Appendix I. Net gas production is defined as the difference between gross gas production and gas delivered to an approved gas gathering system, injected into an approved gas-injection scheme or used for lease fuel.

Pool	Well, Block or Project	GOR Penalty Base
Highvale Lower Mannville A Primary	Project No. 3 00/14-20-050-04 W5 00/16-20-050-04 W5 00/06-29-050-04 W5/2 00/14-29-050-04 W5 00/02-21-051-04 W5/2 00/08-22-051-04 W5	
Peco Cardium C	00/07-05-048-15 W5	140
Pembina Ellerslie A	Project No. 1	
Ribstone Sparky B	00/10-03-043-04 W4/2	70
Swan Hills South Beaverhill Lake A & B	00/02-16-065-10 W5	
Valhalla Doe Creek L	00/06-25-075-10 W6	
Worsley Charlie Lake B	00/02-04-088-07 W6	

3. The production from any well in the listed project or pool shall, where the producing GOR exceeds the level specified in the relevant enhanced recovery and/or concurrent production approval, be restricted to the maximum rate shown subject to a GOR penalty factor calculated based on the penalty base specified below:

Clause 3 Cont'd...

Project or Pool	MRL (m^3/day)	GOR Penalty Base
Boundary Lake South Triassic C Project No. 1	16.0	180

5. The following wells located in pools subject to GPP are assigned the prescribed maximum rate limitations and off-target penalty factors:

Field/Pool	Well	Base MRL (m^3/d/w)	Off-target Penalty
Cessford Mannville Y & Z	00/02-02-025-13 W4	8.0	0.287
Grand Forks Sawtooth L	00/03-12-012-13 W4	8.0	0.127
Grand Forks Sawtooth O	00/16-05-012-13 W4	25.0	0.803
Nipisi Gilwood A - Primary	00/15-24-078-08 W5	20.0	0.250

6. a In accordance with the Board's letter to All Operators dated 20 November 1990, unless otherwise approved by the Board, pools declared in the D-1 (Wabamun) Formation in the fields listed below shall be subject to an MRL of 40 m^3/day per well regardless of drilling spacing unit size.

Belloy	Eaglesham North
Culp	Normandville
Eaglesham	Tangent

b In accordance with the Board's letter to All Operators dated 1 February 1989, pools declared in the Banff Formation in the fields listed below shall be subject to the following:

1. GOR penalty relief on the basis of net gas production as defined in Clause 1 of the Special Provisions to the MRL Order.

2. Unless otherwise approved by the Board an MRL of 25 m^3/day/well regardless of drilling spacing unit size.

Chain	Michichi
Craigmyle	Pearl
Delia	Watts

c Subject to conditions specified in Board letters dated 21 April and 22 June 1993 pools declared in the Granite Wash Formation in the fields listed below shall be subject to Good Production Practice.

Evi	Ogston
Kitty	Otter

7. Wells in any of the listed pools from which gas is not being gathered and delivered to an approved gas gathering system shall be subject to a maximum daily oil rate limitation and GOR penalty base as shown:

Pool	MRL (m^3/d/w)	GOR Penalty Base
Garrington Viking CC & Mannville B	16.0	530

Off-Target Penalty

8. The monthly base MRL of the following wells, blocks or projects shall be subject to the off-target penalty factor specified below:

Pool Name	Well, Block or Project Name	Off-Target Penalty Factor

Miscellaneous

10. a Any well in the Hays Arcs A, C & E Pool exceeding a maximum daily gas production rate of 14.0 10^3m^3 must be shut in.

b Any well not conserving gas in the Penhold Viking B Pool shall be subject to a GOR penalty base of 110 m^3/m^3.

c All wells in Gift Gilwood pools are subject to a maximum producing GOR of 90 m^3/m^3 and a minimum operating pressure (MOP) of 7500 kPaA, as specified by Board Order No. Misc 93446.

e the rate of oil production from the following wells in the Cecil Charlie Lake A Pool shall be restricted to a base MRL of 8 m^3/day/well and a GOR penalty base of 90 m^3/m^3.

00/06-10-084-08 W6
00/08-16-084-08 W6
00/02-23-084-08 W6

f The well located in LS 14-24-75-10 W6 within the Valhalla Doe Creek L Pool shall not be subject to gas oil ratio penalty.

g The rate of oil production in the Enchant Arcs OO Pool shall not exceed 11.8 m^3/day/well. This rate would apply to all drilling spacing unit sizes.

(32 hectare dsu - 0.3688 m^3/day/hectare)
(64 hectare dsu - 0.1844 m^3/day/hectare)

Clause 10 Cont'd...

h

(1) Any well in the Sylvan Lake Jurassic A Pool having a producing GOR in excess of 3000 m^3/m^3 for two consecutive months shall be shut in.

(2) If the producing GOR for LS 14-18-37-3 W5 in the Sylvan Lake Jurassic A Pool exceeds 5000 for two consecutive months the well shall be shut in.

i The rate of oil production from the following wells in the Willesden Green Viking A Pool shall be restricted to:

00/04-06-041-06 W5	15.9
00/02-01-041-07 W5	23.8
00/10-01-041-07 W5	23.8

j The wells located in LS 1-10-34-5 W5 and LS 7-10-34-5 W5 within the primary mechanism of the Caroline Rundle A Pool shall be subject to a maximum rate limitation of 15 m^3/day/well.

k Any well in the Provost Upper Mannville M6M Pool having a producing GOR in excess of 100 m^3/m^3 shall be shut in.

l All wells conserving gas in the primary mechanism of the Kakwa A Cardium A Pool are subject to Good Production Practice.

n Project No. 1 and Project No. 2 within the Countess Upper Mannville D Water Flood are subject to Good Production Practice.

o The maximum producing GOR (gross) in the Wainwright Nisku A Pool shall not exceed 1 500 m^3/m^3 for 3 consecutive months. Any well in the pool exceeding this level shall be shut in until the well can demonstrate production characteristics below this level.

p The well located in LS 8-30-46-1 W5 within the primary area of the Pembina Belly River FFF, GGG, K2K and S2S Pool shall not be subject to gas oil ratio penalty.

s The maximum rate of oil production from the Utikuma Lake Keg River Sand MM Pool shall be reduced to 19 m^3/day/well if, at any time, the monthly producing GOR of either well exceeds the base GOR of 140 m^3/m^3.

11. The listed pools are subject to special MRL's as shown:
